5. March 18, 2012 – Los Angeles CA. Number of attendees is limited to 177

Why should you take the seminar?

There are ***4 very important factors*** that will make you interested in learning more about these powerful and life changing seminars.

Factor #1:

It is very important to know that medicinal leeches are not Bad Blood Sucker. Medical doctors and leech therapists use medicinal leeches to help heal the body because of the 65 plus

chemical ingredients the medicinal leech has in its saliva that provide a multiple health benefits from pain, arthritis, venous and skin diseases to ear ringing.

Factor # 2:

The medicinal leeches do not hurt at all. In fact, while in therapy session, people always report that they feel relaxed, at ease, sleepy and pain free. They are scientifically known to provide instant and lasting mobility for those who are being crippled by pain.

Factor # 3:

The Food and Drug Administration (FDA) approved in 2004 medicinal leech as a medical device for micro and constructive surgery. The anti-bacteria, the anti-inflammatory, the anti-coagulant, the vasodilator and other peptides in the leech's saliva help difficult micro and constructive surgeries to be successful.

Factor #4:

You.

You are God's manifestation. Your body has a talent that you received at birth; and is the most important thing to you. This is the ability to cause your body to heal itself. You don't have to be sick with pain all the time. There are solutions to your problems when you believe and when you take immediate action.

Diseases are normally organic and/ or psychogenic. Our training will provide you information how holistic leech therapy can help you stay or become healthy and pain free, naturally. Hear what one of my clients has to say: *"I wished I knew you before, because you have helped me release the pain of neuropathy, brought on by chemo therapy. Your holistic leech therapy has improved my condition and enhanced the quality of my life. Thank you"*. C.H. Miami, Florida. Don't wait; sign up for the seminar today!
